B. Presentation on TSMO Activities at Federal Highway Administration

Mr. Nick Finch, Associate Division Administrator, Federal Highway Administration (FHWA) will present on some of the Administration's national activities regarding TSMO strategies and implementation.

VII. Common Presentations/Status Reports (Presentations will be made at the TAC meeting)

A. Presentation on ETDM Planning Screen for Maitland Blvd. Widening Project

The Efficient Transportation Decision Making (ETDM) process was developed by FDOT in the early 2000s in order for federal, state and local agencies to have an opportunity to evaluate the socioeconomic and environmental impacts of major capacity transportation projects prior to the projects going through the PD&E phase, and to provide comments on the impacts for FDOT and the local MPO to consider in programming these projects. As a result, if there are any impacts that could potentially cause a project to be delayed or cancelled, these impacts can be identified before any funding is actually spent on the project.

The first step in the ETDM process is the Planning Screen review of a project, which includes developing a Purpose and Need Statement describing the project going through the screening process. The next project to go through the ETDM Planning Screen process is the widening of Maitland Boulevard from Bear Lake Road to the Orange/Seminole County line. Mr. Keith Caskey, MetroPlan Orlando staff, will give a brief overview of this project, and committee members will have an opportunity

to provide any comments or input they would like to have considered in the Planning Screen review of the project. The Purpose and Need Statement for the Maitland Boulevard project is provided at **Tab 3**.
